IDENTIFIERS *Colorado; Integrated Postsecondary Education Data System

ABSTRACT

This edition of a statistical report on Colorado's academic libraries begins with a section of tables organized by sector (public or private) and board (governing board or agency) that includes library-by-library statistics as well as summary figures for boards and sectors. Following these tables are three sections of charts that illustrate how Colorado's university, college, and community college libraries rank on selected statistics. In contrast to previous reports strict sector and board comparisons were dropped for these charts to enable more reasonable comparisons. Data elements are those of the Integrated Post-Secondary Education Data System (IPEDS) to enable comparisons with other states when the figures are available, including: (1) library staff; (2) staff expenditures; (3) collection expenditures; (4) miscellaneous operating expenditures; (5) library collections; (6) annual library services; and (7) library services per typical week. The charts illustrating statistics and input-output measures are grouped for Colorado universities, colleges, and community colleges. (SLD)

INTRODUCTION

As in 1990, this edition begins with a section of tables organized by sector (i.e., public or private) and board (e.g., University of Colorado State Board of Agriculture, Colorado Community College & Occupational Education System) which includes library-by-library statistics as well as summary figures for boards and sectors. Following the tables are three sections of charts which illustrate how Colorado's university, college, and community college libraries rank on selected statistics. For these charts, the strict sector and board divisions were abandoned to permit more reasonable comparisons. It should also be noted that, upon their request, the FTE enrollment figure for University of Colorado Health Sciences includes teaching faculty and research fellows.

We are obtaining completed 1992 IPEDS library surveys from out-of-state peer institutions. These peer institutions are matched by the Colorado Commission on Higher Education (CCHE) to Colorado academic institutions. After constructing a data file based on these returns, we will produce a **Colorado Academic Library Profile** report comparing each Colorado institution to its peers.

In addition to **Statistics & Input-Output Measures** and the **Profile**, we are always willing to assist libraries in conducting research. The services of the Library Research Service are available to all Colorado libraries at no charge on a first-come, first-served basis. Please keep us informed of your changing management information needs.
